DETAILED ACTION

Priority

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Erie et al.

Figure 2 illustrates a laser system having a grating (16) connected to a bending mechanism (20A) for providing compressive force or tension force for adjusting the curvature of the grating. The bending mechanism is connected to a grating curvature stepper motor for the controlling the grating curvature and holding the position of the grating constant, as disclosed in column 4 lines 38-45. As shown the bending mechanism and the stepper motor are separate structures where one provides the

curvature bending and the other controls curvature adjustment while maintaining it at a constant position.

Prior Art

The prior art made of record but not relied upon is considered pertinent to the disclosure of the invention: Sandstrom (PN 5,095,492).
